EXPERIENCE

DUKE UNIVERSITY– *Teaching Assistant (Foundations of Business Analytics)* — Durham, NC
Nov 2025 – Jan 2026

- Coordinated course logistics and managed end-to-end student communications for an Executive MBA course with 160+ students, partnering closely with Professor Saša Pekeč.
- Led review sessions and contributed to evaluation processes by assisting with grading assignments and exams, maintaining academic standards and deadlines.

DUKE ADVANCED DEGREE CONSULTING CLUB– *Pro Bono Student Consultant* — Durham, NC
Sep 2025 – Jan 2026

- Conducting market research, data analysis, competitive benchmarking, and developing a brand positioning strategy for a nutrition-based non-profit to inform real client insights.
- Crafted storytelling-driven presentation materials that translated analytical findings into clear, actionable recommendations, supporting data-informed initiatives.

OPTMYZR TECH. INDIA PRIVATE– *HR & Operations Associate* — Hyderabad, India
Aug 2023 – Jun 2024

- Designed and automated HR workflows through custom Zoho and Google Drive scripting, streamlining operations and reducing workflow time by approximately 10 hours.
- Cleaned, maintained, and standardized HR data across multiple systems for four international offices, ensuring data consistency and supporting scalable onboarding processes.
- Drove stakeholder engagement by leading regular discussions and performance reviews with department heads, contributing to a 20% improvement in employee satisfaction.

GLOBAL BOILERS MIDDLE EAST– *Financial Analyst Intern* — Dubai, U.A.E
May – Jul 2022

- Conducted KPI-based financial analysis across two fiscal years to evaluate trends and operational inefficiencies, demonstrating strong business acumen and strategic insight.
- Generated inventory insights and proposed data-backed improvements for resource allocation and stock turnover optimization to reduce overstocking by 10%.

SELECTED PROJECTS

Revenue Intelligence Dashboard (Tableau): Built an interactive Tableau dashboard analyzing ~$80M in revenue, incorporating KPI tracking, time-series trends, geographic performance, and product-level insights. Pareto and segmentation analysis to identify key revenue drivers and high-impact product lines and developed dynamic visualizations and filters to translate complex data into clear, actionable insights for business decision-making.

Analyzing Dognition (SQL): Performed exploratory analysis on confidential database using JOIN, CTEs, and window functions to draw business insights into consumer behavior patterns for dog assessment firm Dognition, generating recommendations to improve customer experience and retention.

Predicting House Prices (Python): Built and trained a multi-layer perceptron on a 15,000-property Zillow dataset to evaluate pricing accuracy and the profitability of the iBuyer business model — applying large-dataset analytical thinking comparable to Fed/FDIC financial data work.

TECHNICAL CAPABILITIES

SQL/MySQL, Python, R, Tableau, C++, Advanced Excel (VBA, Pivot Tables, Vlookup), Jupyter, Google Analytics, A/B testing.

ADDITIONAL INFORMATION

Fluent in English and Hindi, conversational in Arabic and basic German. I love to read, paint, and solve cryptic crosswords.
